SUMMARY

Enthusiastic and results-driven Software Engineering undergraduate with a strong foundation in Business Analysis, Full-Stack Development, Software Engineering, and Project Management. Equipped with hands-on industry experience in requirements elicitation and analysis, stakeholder communication, software development, process improvement, and project coordination. Adept at translating business requirements into practical technology-driven solutions and collaborating effectively with cross-functional teams throughout the software development lifecycle. Possess a strong analytical mindset, problem-solving capabilities, and a keen interest in leveraging technology to address complex business challenges. Currently seeking opportunities in Business Analysis or Project Management where I can contribute technical expertise, analytical thinking, and effective communication while continuing to develop as a technology and business professional.

WORK EXPERIENCE

Full Stack Developer , Astute Business Partners

April 2026 - June 2026

- Developed full-stack web applications using React.js, TypeScript, Python, and FastAPI, with a focus on scalability, performance, and usability.
- Designed responsive UI/UX solutions and integrated RESTful APIs with Supabase databases.
- Contributed to the AstuteIQ.io internal paraplanner tool, supporting workflow digitization and operational efficiency.
- Supported requirements analysis, project planning, task prioritization, stakeholder communication, testing, and debugging throughout the SDLC.
- Collaborated with cross-functional teams to deliver business-aligned technology solutions and utilized GitHub and Claude Sonnet 4.6 to enhance development productivity.
- Technologies: React.js, TypeScript, Python, FastAPI, Supabase, GitHub, Figma, Claude Sonnet 4.6

Intern Software Engineer - 06 months internship, icieos (Pvt) Ltd

2025 - 2026

- Course Pivot – Educational Platform: Developed a full-stack platform for online course management, transactions, payment processing, and administrative analytics.
- Service Marketplace: Contributed to a scalable marketplace connecting clients and service providers, developing frontend/backend modules and RESTful API integrations.
- Clarity Score – Performance Evaluation System: Designed a rule-based performance evaluation system with automated scoring, role-based dashboards, analytics, and configurable evaluation criteria.
- Corporate Web Solutions: Developed responsive, dynamic websites across salon, cybersecurity, agriculture, and charity sectors, focusing on UI/UX, responsiveness, and performance.
- Technical Contributions: Applied requirements analysis, API integration, database management, testing, debugging, and workflow optimization across projects.

Full-Stack Engineer , DMS Software Technologies (Pvt) Ltd

July 2024 – January 2025

- Contributed to enterprise software solutions for Sri Lanka Railways using Oracle Forms, Oracle Reports, and PL/SQL, including inventory and procurement modules.
- Participated in requirements gathering, client discussions, and UI/UX reviews, translating business requirements into functional solutions.
- Gained end-to-end experience across the SDLC, including analysis, development, testing, deployment, and technical documentation.
- Contributed to the NKAR Tour Guide Project, developing user-focused solutions aligned with tourism and travel-planning requirements.
- Collaborated with development teams and clients to refine features, gather feedback, and ensure alignment with business and user expectations.

EDUCATION

Advanced Certificate Course in Human Resource Management

2026 - Present

- National Institute of Business Management (NIBM)

Certification of Project Management, Cyber Security (Open Learning Platform) - (Reading)

2022 - 2026

- University of Moratuwa

University of Moratuwa

2022 - 2026

- Sri Lanka Institute of Information Technology (SLIIT)

CERTIFICATIONS

- Online Learning programme in Python, Frontend Web Development, Web Design : University of Moratuwa
- AI/ML Engineer - Stage 1 : Sri Lanka Institute of Information Technology (SLIIT)
- AI/ML Engineer - Stage 2 : Sri Lanka Institute of Information Technology (SLIIT)
- AI/ML Engineer - Stage 3 : Sri Lanka Institute of Information Technology (SLIIT) - (Reading)
- HTML Course, Java Course, Introduction to SQL : Sololearn Online Institute
- Software Engineer Intern, Frontend Developer (React): HackerRank

INDIVIDUAL PROJECTS

- 1.Chatbot Application
 - Used Technologies: MongoDB, Express, ReactJS, NodeJS, VS Code
 - Built a chatbot app capable of handling user queries and providing automated responses.
 - Implemented message handling, basic natural language processing, and a user-friendly chat interface.
- 2.Resume Analyzer
 - Used Technologies: MongoDB, Express, ReactJS, NodeJS, VS Code, python
 - Built a web application that analyzes uploaded resumes and provides insights such as keyword density, formatting issues, and job match suggestions.
 - Enabled users to upload .pdf or .docx files and receive instant feedback on resume quality.
- 3.E-commerce Web Application
 - Used Technologies: MongoDB, Express, ReactJS, NodeJS, VS Code
- 4.Fitness Web Application
 - Built a web application designed to track personal workouts, set daily activity goals, and monitor calorie intake.
 - Features user authentication, real-time fitness metrics tracking, and customized workout schedule recommendations.
- 5.Bus Ticketing System
 - Used Technologies: MERN Stack, qrcode.react
 - A full-stack web application for booking bus tickets online in Sri Lanka. Users can view buses, book seats, and scan QR codes for tickets. Built with React, Node.js, Express, and MongoDB

GROUP PROJECTS

- 1.TopJobs.lk User Interface Redesign
 - Used Technologies: Figma
 - Redesigned the user interface for TopJobs.lk to enhance user experience, visual structure, and platform navigation.
 - Created high-fidelity interactive wireframes and prototypes focused on streamlining job search and application flows.
- 2.Travel Reservation Web Application: Hotel and Booking Management System
 - Used Technologies: MERN Stack (MongoDB, Express, ReactJS, NodeJS), Postman, VS Code
 - Developed a full-stack booking system enabling users to search accommodations, check real-time availability, and reserve rooms.
 - Built administrative controls to manage hotel listings, pricing structures, and incoming customer reservations.
- 3.Online Learning Platform: Learning Plans & Skill Sharing
 - Used Technologies: MERN Stack, Spring Boot, Java, Postman, IntelliJ IDEA, VS Code
 - Architected a full-stack learning platform allowing users to create custom study plans and share skills.
 - Built microservices and RESTful APIs to handle course enrollment, progress tracking, and interactive learning modules.

TECHNICAL SKILLS

- Programming Languages: Java, Python, C/C++, JavaScript, Kotlin, PHP, R
- Frontend Development: HTML, CSS, React.js, Web Flow
- Backend Development: Node.js, Spring Boot, Express.js
- Database Management: MongoDB, MySQL, Oracle, PL/SQL, Firebase
- Tools and Platforms: GitHub, Power BI, Apache Tomcat, Eclipse
- Mobile Development: Android (Java & Kotlin), Android Studio, Mobile UI/UX Design, React Native, Flutter, Redux
- Data Analysis: Power BI, Excel, Python (Pandas, Matplotlib)
- Designing Tools: Figma, Canva Pro, Balsamiq
- Other Technical Skills: User Research, Trello, Jira, Kanban, VS code, Tailwind CSS, Confluence

SOFT SKILLS

- Leadership
- Strategic Planning
- Critical thinking
- Stress management
- Problem-solving
- Flexibility

TESTING SKILLS

- Manual Testing
- Software Testing
- Version control
- User Acceptance Testing
- Bug Tracking
